**Subject:** Griffiss AFB draft PFAS (AFFF) SI Report

All,

Got this today for **GRIFFISS AFB**.

I have given hard copies to Marian and Rachel and have put the document on the R drive at R:\BMORSE\docs\Griffiss AFB\Griffiss PFOS-PFOA\Basewide SI\Report\Draft\AF

You all already have access to my R Drive.

As with Plattsburgh's, I took a quick look and also had a conversation last week with Dave Farnsworth of the AF. Please note:

- The AF has titled the document as a Site Inspection (vs Site Investigation) and as an AFFF rather than PFAS document.
- The AF recently informed me that they do not intend to do an RI at any of the sites at the base. The Report has no recommendations section, and an RI is not mentioned. However under the executive summary, the individual site discussions, and at the end of the document, there are conclusions and summaries that do discuss the need for additional work – mainly related to completion of exposure pathways and surface water bodies. In my quick look, I did not notice a lot of specificity to them.
- The lack of a follow up RI could quickly become a national issue as SI's come in from other sites. I am not sure how to advise you on this so comment as you see fit.

If you could provide comments to me by COB Friday May 19, I would appreciate it. Please let me know if you have any questions or if you think you'll need more time for your review. Thank you!

Bob
